## Mini Pallet Handler

with capacities of 1,500 to 2,000kg

*The World of Hangcha*  
SINCE 1956

# Mini Pallet Handler

The mini pallet handler is a new generation product developed by Hangcha for warehousing and logistics applications. Powered by a stable lead-acid battery and with high performance, comfortable, safe and reliable operations, as well as a low use cost, it is an ideal tool for loading, unloading and handling palletized goods in warehouses, supermarkets, workshops and homes.

## Exterior

- / The mini pallet handler adopts a specialized industrial exterior design. The vehicle has a smooth vivid profile, a compact shape and a fully ergonomic design, and follows the exterior design trend.
- / It is 90% made of steel plates that are molded by stamping, so the exterior is robust, durable and high-grade, and meets environmental protection requirements.

## High performance

- / With high power and a rated load of 1.5-2 tons to meet the handling needs of most customers.
- / The 1.5t handler uses a DC permanent magnet brushed walking motor and a DC permanent magnet brushed control system.
- / The 2t handler uses a DC permanent magnet brushless walking motor and a DC permanent magnet brushless control system.
- / The vehicle has a regenerative braking function and provides protection to prevent sliding down a ramp.
- / All parts such as the motor controller, hydraulic pump station, switches, connectors, etc. are reliable products.

## Reliability

- / The four-point design and two auxiliary wheels make steering safer, as well as more stable and reliable.
- / Optimized mast which is stable, reliable and subject to a small force.
- / The whole system uses domestic quality waterproof connectors, and all wires and cables have reliable protection, which greatly improves the reliability of the electrical system.
- / With a low noise and low vibration hydraulic power unit to enable stable and reliable lifting and descending.
- / The stamped fork with higher strength and impact resistance, and guided fork prongs, further improve operation efficiency.
- / The interlock switch is a non-contact proximity switch with high reliability.
- / The integrated iron wheel casing can protect the vehicle body from external impact well.

## Maintenance

- / The battery indicator can duly prompt the user to charge.
- / Hood convenient to open, enabling a clear view of the components and easy maintenance of the truck.
- / With all spindles equipped with lubricated sleeves to facilitate maintenance and a long service life.
- / The joystick assembly can be removed separately, and thereby can be maintained and packed easily.

Operating handle

Cooling system

Steering wheel

Lifting cylinder

## Comfort

- / With the reliable, compact and stylish modular joystick with internal parts that can be replaced separately, all operations can be completed with one hand.
- / The optimized body structure enables the forklift to have an excellent operating view.
- / Being compact, lightweight and flexible, it has a function of upright driving and can be operated very easily. It can be operated in narrow aisles, e.g., in a container.
- / With a guide device added, the fork provided for the standard configuration is 80mm in height and has prong tips inclined at 2 degrees to access the pallet (including the closed pallet) more easily.
- / Removed from the front, the lead-acid battery can be replaced easily and quickly, and meets the need of long operation.

## Safety

- / With the functions of release braking, reversing braking and emergency braking to ensure safe driving.
- / Anti-roll back function to ensure safe operation.
- / Emergency reverse button on the tiller head able to effectively avoid harms to the driver in case of any emergency during backward driving.
- / With the dual protection by the electronic lifting limit and mechanical limit switches that are provided for the standard configuration, the impact caused by lifting to the top can be avoided and the safety of the goods can be ensured.

## Standard Specification

- / DC permanent magnet brushless drive motor (2t)
- / DC permanent magnet brushless controller (2t)
- / Emergency shut-off switch
- / Battery level gauge
- / Polyurethane tire
- / DC permanent magnet brushed drive motor (1.5t)
- / DC permanent magnet brushed controller (1.5t)
- / Fork interval: 560mm
- / Electronic lifting limit
- / Fork length: 1150mm
- / Non-contact interlock switch
- / Modular joystick
- / Electric horn
- / Stable quality lead-acid battery
- / Slow upright driving
- / Guide device-equipped fork for closed pallets
- / Double load wheels
- / Automatic hibernation function
- / Additional wheel(2t)

## Options

- / A full range of prong lengths
- / A full range of prong intervals
- / Single load wheel
- / Code lock
- / Fork surface from the ground: 75mm

# Mini Pallet Handler Specification
